- Accelerated delivery through re-use of project experience
- Proven PRINCE2 methodology

SERVICE OVERVIEW

In a fast moving industry where competition is never far away, the need to protect and strengthen your customer relationships has never been greater. Every new project brings with it an opportunity either to gain or lose customer trust – the most vital element of a long term business relationship. A reputation for effective and consistent project delivery can be everything.

With a dedicated team of Project Managers focused exclusively on serving our customer base, Stage is uniquely positioned to help ensure your projects are professionally managed and delivered to time, budget and quality expectations.

Our delivery capability is founded on a wealth of collective 'real world' project experience. This is combined with tried and tested, PRINCE 2 based Project Management Methodology, all of which enables Stage to deliver your projects consistently with the minimum of technical and commercial risk.

Experience has shown that these benefits become especially important for project situations involving mixed business requirements, some of which can often be new to staff and the company as a whole. Similarly, our services offer a prudent delivery option for customers whose own project management resources are already heavily utilized.

As with all of our services, our approach is to work seamlessly with you as a trusted extension of your team – and with a level of autonomy that's right for you and your project.

So whether you're engaging Stage as part of a larger project that you're managing, or engaging us to deliver an entire project on your behalf, make Stage your first choice for professional Project Management services that deliver.
